VERMONT LADY'S Desperate Fight for Life.

Mrs. Nathan Beale says:

Paine's Celery Compound

Saved fle from the Insane Hospi-

tal as Well as Cured My Rheumatism.

There never was a remedy so highly recommended as Paine's Celery Compound. There never was a remedy in such universal demand. It is popular and prized in tens of thousands of homes, because it makes sick people well.

Paine's Celery Compound has saved thousands from nervous prostration and collapse; it has effected wonderful cures in kidney and liver complaints: its victories over rheumatism and neuralgia have commanded the attention and admiration of our best physieverything else has falled.

Mrs. Nathan Beals, a well known lady of Gallup's Mfils, Vt., writes as follows:-"For ten months before I commenced taking Paine's Celery Compound, I could not put my foot on the first round of my chair, only five inches from the floor. I had nearly lost the use of my left side, and I could not lift a pound weight with the left hand without danger of dropping it. Many imes I would lift something at the table, only to drop it. I had a pressure in the top of my head and a pain at the base of the brain, which would leave me so nervous that I used to tell my husband I would surely go crazy. I could not keep still at night, and Sundays were just awful to me. found my whole system prostrated, and it took a long time to build up my poor, wornout nerves. I think that Paine's Celery Compound saved from the Insane Hospital, as well as ured my rheumatism.

OUR PUBLIC SCHOOLS.

Breadth of Their Foundation and What Citizens Owe to Them.

rom a Recent Speech by President But-ler, of Columbia University. The schools which are maintained by

governmental authority are established n the interest of the whole people and because of the controlling conviction that an instructed and enlightened population is essential to the perpetuity of democratic institutions and to their tragic death in an eastern village, and effective operation. The schools are therefore a proper charge upon all taxpaying persons and property, and not merely upon those whose children receive instruction therein. Nor are they in any sense schools which are provided for the poor or the unfortunate. When stated, this principle seems ax-

iomatic. Nevertheless, it is openly or impliedly denied with surprising frequency. It is safe to say that in all of our large cities there is a class of persons, by no means inconsiderable in number, who look upon the tax-supported schools as they look upon almshouses and asylums. Such persons regard the schools as a part of the comminity's charitable or equipment. In my view, on the other are so occupied with our own affairs hand, the schools are a part of the hat we cannot stop to feel sorry. It is community's life. They are not merely simply because there is so much grief to give relief or shelter to individuals they are to minister to the democratic necessarily be remote from us and ideal. The very children who sit on the benches are regarded not merely as children, interesting, lovable, precious, out as future citizens of a democracy with all the privileges and responsi bilities which that implies.

We may wish that these schools did many things differently, we may not have children to send to their classrooms; nevertheless they are our schools because we are American citi zens, and we owe them our loyal service as well as our ungrudging support Any one who wishes, for personal, so cial or religious reasons, to have his child receive a training other than that which the tax-supported schools give, is quality in that it was genuine. THE SLEEPING SICKNESS.

Queer Disease Which British Scientists Will Soon Investigate. From the New York Sun.

The British government is investi gating a mysterious disease which was first observed, about fifteen years ago, in native villages along the Congo, known as the sleeping sickness. The cause of the malady is not understood nor has a cure been discovered. White men seem to be safe from its attacks but the victims among the natives are numbered by many thousands. ley lived for five years on the Congo and never heard of the disease, which began to attract attention some years after he had founded his stations alons the river. The malady has been gradually spreading eastward until it has reached the British territory of Uganda where several thousand natives have died of it within the past year. The commission sent out by the British government will study the disease in that
